

## ECON 2110 — Midterm 2 Grading Note

---

Spring 2026

Midterm 2 had 112 total possible points. In Canvas, you will see your *Midterm 2 — Raw Score* (out of 112, expressed as a percent) and your *Midterm 2 — Curved Score* (out of 100). I will use your curved score when computing your course grade.

### Raw Score

Each Multiple Choice problem was worth 4 points and each Free Response subproblem was worth 4 points. So your raw score is

$$4 \times MC + FR$$

Where MC is how many multiple choice problems you got right and FR is your combined points on the Free Response portion.

### Curved Score

You can interpret the curved score on the usual 0–100 scale. (I do not assign letter grades until the end of the course, but as a rough guide: 93+  $\approx$  A, 90–93  $\approx$  A-, 87–90  $\approx$  B+, and so on.)

You may review the exam problems and solutions on Canvas (and at [this link](#)). You may review your submissions on Gradescope via Canvas.

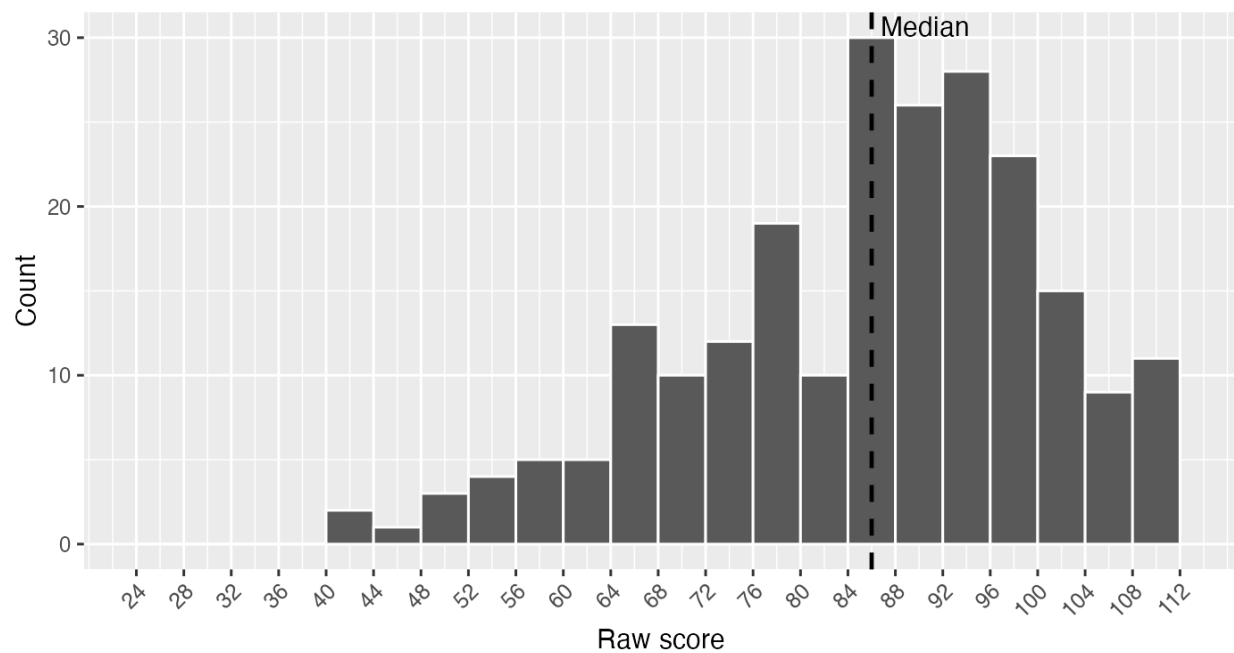

## Class Score Distribution

### Raw Scores (out of 112): Summary Statistics

| Statistic                | Value |
|--------------------------|-------|
| N                        | 226   |
| Mean                     | 84.2  |
| Standard deviation       | 14.7  |
| Minimum                  | 40.0  |
| 10th percentile          | 64.0  |
| 25th percentile          | 76.0  |
| Median (50th percentile) | 86.0  |
| 75th percentile          | 96.0  |
| 90th percentile          | 100.0 |
| Maximum                  | 112.0 |
| Number of perfect scores | 1     |
